Sporlan Electronics Platform Offering Increases with the Launch of a New Line of Refrigeration Controllers

Chicago, IL – January 23, 2012 – Parker Hannifin Corporation, the global leader in motion and control technologies, announced a new line of plug-in refrigeration controllers – the Sporlan PSK Line at the 2012 AHR Expo.

The PSK line is a broad family of controllers intended to provide simple and reliable control to a wide variety of low temperature (< 35°F) and medium temperature (35° - 45°F) applications.

PSK201, PSK203 and PSK204 are ideal for applications with 1 or 2 temperature sensor inputs such as a medium temperature stand-alone dairy/beverage cooler. These are 1, 3 and 4 relay (respectively) controllers. PSK203 and PSK204 have additional relays to control active defrost (either electric or hot gas bypass) and fans in low temperature applications.

Other models in the line (PSK221, PSK231, PSK233 and PSK214) serve more complex applications, like a reach-in freezer with electric defrost, door switches and network communication to a central control/monitoring system. These are also 1, 3 and 4 relay (respectively) controllers with 2 or 3 temperature sensor inputs, but they also include a variety of other enhanced features such as multipurpose inputs that can be user-configured (for door switches, extra temperature sensors etc), RS485 Modbus communication, Programming Key support, HACCP data logging and alarms. Also, the multiple relay versions are intended for low temperature applications and can control active defrost and fans.

All of the products in the PSK line have IP65 protected front bezels, 3 ½ digit displays that allow + and – temperatures to be displayed with at least two digits, colored icons that are easy to understand, advanced compressor control to eliminate short cycling and are available in both 120VAC or 230VAC versions.

The PSK line of plug-in refrigeration controllers is available now to Sporlan Authorized Wholesalers and OEM customers.

Visit Parker Sporlan at the 2012 AHR Expo at booth #5135 to learn more about the PSK family controllers. For more information on the electronic products offering, contact Parker Hannifin - Sporlan Division, 206 Lange Drive, Washington, MO 63090. Phone 636-239-1111 or visit www.sporlan.com.

With annual sales of \$12 billion in fiscal year 2011, Parker Hannifin is the world's leading diversified manufacturer of motion and control technologies and systems, providing precision-engineered solutions for a wide variety of mobile, industrial and aerospace markets. The company employs approximately 55,000 people in 46 countries around the world. Parker has increased its annual dividends paid to shareholders for 54 consecutive years, among the top five longest-running dividend-increase records in the S&P 500 index.
