Sporlan MT Alliance Supermarket Control System Provides Facility Management at a Glance

Chicago, IL – January 23, 2012 – Parker Hannifin Corporation, the global leader in motion and control technologies, introduced its supermarket control system to the US market at the 2012 AHR Expo.

The Sporlan MT Alliance System has a simple, intuitive interface connected to powerful hardware and software for the control of supermarket refrigeration, HVAC and lighting systems. Visual indicators within the system provide users with quick facility management at a glance. Analytical tools within the software monitor trends, compare and correlate data as well as provide comprehensive data logging to allow for smart alarm management, improved food safety and management of energy costs. The Sporlan MT Alliance solution provides control and monitoring that scales from the multi-store/multi-location enterprise level all the way down to the performance of specific cases in specific stores.

“The Sporlan MT Alliance System not only provides best in class energy management tools to the food retail market, but it also delivers to the bottom line measurable savings in shrink, maintenance, monitoring and energy costs,” said Serge Desmarais, Business Unit Manager, Parker Sporlan.

A recent customer evaluation and competitive analysis conducted by the business revealed that the MT Alliance System provides an additional \$10,000 of annual savings over competitive energy management systems and up to \$30,000 (in energy, service and shrink costs) annually over traditional refrigeration, HVAC and lighting system management.

Visit Parker Sporlan at the 2012 AHR Expo at booth #5135 to learn more about the Sporlan MT Alliance Supermarket Control System.

Parker acquired Micro Thermo Technologies in August of 2010 and integrated the business into its Sporlan Division. The Canadian company produces control and energy management systems for supermarket applications and is now a part of the Sporlan Electronics offering, including the Micro Thermo Technologies full line of refrigeration, HVAC, lighting and energy control products installed in approximately 2,500 stores throughout North America.

For more information on the electronic products offering, contact Parker Hannifin -- Sporlan Division at 636-239-1111 or visit www.microthermo.com

With annual sales of \$12 billion in fiscal year 2011, Parker Hannifin is the world's leading diversified manufacturer of motion and control technologies and systems, providing precision-engineered solutions for a wide variety of mobile, industrial and aerospace markets. The company employs approximately 55,000 people in 46 countries around the world. Parker has increased its annual dividends paid to shareholders for 54 consecutive years, among the top five longest-running dividend-increase records in the S&P 500 index.
